

## BRIEF INSTRUCTIONS TO AUTHORS

**e-planet** publishes peer reviewed original research articles, and review articles in English on multifarious aspects of ecology, environmental science, engineering, medicine, agriculture and allied sciences etc. in the form of full-length papers having a bent towards environmental issues.

- 1. Submission of manuscript.** The manuscript prepared in MS-WORD, along with tables and figures in MS-EXCEL and photographs in JPG/ Photoshop format should be sent to the Editor-in-Chief, e-planet (OPES) through e-mail viz: rksamantaray@rediffmail.com giving details of telephone/ e-mail of all the authors.
- 2. Preparation of manuscript.** Papers should be written in simple and clear language, strictly following the latest e-planet journal style not exceeding seven printed pages. Avoid footnotes in the text. The complete scientific name (genus, species and authority for the binomial) of all the experimental organisms/materials should be given at the first mention both in the Abstract and Materials and Methods. International System of Units abbreviated form should be used for all the measurements. Spell out the acronyms in the first instance. Manuscript should be typed in double-spacing on one side of Bond Paper (A-4). Tables must not exceed 12 vertical columns. Leave liberal margins on both the sides. Arrange the manuscript in the order of short title, title, author (s), address/ institution of each author, abstract (approx.300 words), key words(approx.- 5), introduction, materials and methods, results and discussion, acknowledgement (if any) and references.
  - 2.1 Short title/ Title.** A short title of the paper in capital should appear on the top of the article, followed by the long title in small letters. The short title appears on alternate printed pages of each article.
  - 2.2 Author(s).** Author(s) name(s) should be typed in bold letters, first initials and then surname. Corresponding author's name should be specified by an asterisk mark. Serial numbers of authors be given on top right ex. 1,2,3 representing the group of authors from the particular institution. Corresponding name of the institutions/ place of work be given serially below the authors name. e-mail id be indicated below the detailed address.
  - 2.3 Abstract.** 200-300 words convening the objectives, methodology and the most important results.
  - 2.4 Key words.** Ideally 5-6 key words should be provided for subject indexing. The words be presented in small letter except the first one.
  - 2.5 Introduction.** It should be concise and include the scope of the work in relation to the state of art in the same field along with specific objectives.
  - 2.6 Materials and Methods.** A full technical description of the methods followed for the experiment(s) should be given, providing enough information. Detailed methodology should be given when the methods are new while for standard methods, only references may be cited.
  - 2.7 Results and Discussion.** In this section, only significant results of the experiment(s) should be reported. Along with the tables and figures, the discussion should deal with interpretation of results and relate the author's findings with the past work on the same subject. The conclusions drawn should be explicitly listed at the end of this section.
- 3. References.** Refer this copy from July 2014 onwards for references. For Ex. Thankppan, A., Das, B.K., Barman, H.K. and Samal, S.K. 2008. Genetic fingerprinting of *Aeromonas hydrophila* isolated from diseased fresh water fishes of eastern India. *e-planet*. 6(2): 01-06. Distinction for the same author and same year be done as e.g. 2014a, 2014b. Unpublished data, and personal communication are not acceptable as reference but may be referred to parenthetically in the text. All references should necessarily be quoted in the text and vice versa.
- 4. Table.** Number the tables consecutively in Arabic numerals. Tables should have comprehensible legends. Conditions specific to a particular experiment should be stated. Zero results must be represented by 0 and not determined by n.d. The dash sign is ambiguous. For values < 1, insert a zero before the decimal point.
- 5. Illustrations.** All graphs, diagrams and half-tones should be referred to as Figure and should be numbered consecutively in Arabic numerals. The figures should either match with the column width (8.5 cm) or the printing area (17.8×22 cm). The legends should be brief and self-explanatory. All graphs, figures should be drawn by MS-EXCEL and submitted in editable format. Define in the footnote or legend any non-standard abbreviations or symbols used in a table or figure. Photographs, which must be kept to a minimum, should be good quality glossy prints.
- 6. Reviews.** Full length review articles (max. 10 pages) are invited.
